

PRINCIPLES OF INSTRUMENTAL TECHNIQUES IN NUTRITION

Academic year: 2019-2020
 (Last actualitation 10/05/2019)

MODULE	CONTENT	YEAR	TERM	CREDITS	TYPE
Complements of Formation	Principles of Instrumental Techniques in Nutrition	3 rd	2 nd	6 ECTS	Optative
LECTURER	CONTACT INFORMATION				
José Manuel Paredes Martínez Emilio Garcia Fernandez	Department of Physical Chemistry. Faculty of Pharmacy. Campus Universitario de Cartuja. 18071 – Granada. Telephone: 958243829 Email: jmparedes@ugr.es				
	TUTORSHIPS <u>Paredes Martínez, José M.</u> (Room 198) Tuesday: 9:00–11:00 Wednesday: 12:00–14:00 Thursday: 9:00–11:00 <u>Garcia Fernandez, Emilio</u> (Room 202) First term Tuesday: 12:00–14:00 Wednesday: 12:00–14:00 Thursday: 12:00 a 14:00 Second term Tuesday: 11:30–12:30 and 13:30–14:30 Wednesday: 12:00–14:00 Thursday: 11:30–12:30 and 13:30–14:30				
DEGREE WITHIN THE SUBJECT IS TAUGHT					
Human Nutritional and Dietetics					
PREREQUISITES and/or RECOMMENDATIONS					
Proper knowledge about: <ul style="list-style-type: none"> • Mathematics. • General Chemistry. • Physics. 					
DETAILED SUBJECT SYLLABUS					

THEORETICAL SYLLABUS

- **UNIT 1.** Introduction to Instrumental Analysis in Foods.
Introduction. Classification. Applications. Quantification. Phases and criteria of an analytical method.
- **UNIT 2.** Chromatographic techniques.
Concept and classification. Chromatography theories. Chromatographic parameters.
- **UNIT 3.** Principles of UV-Vis spectroscopy.
Electro-magnetic radiation. Spectroscopy of UV-Vis light. Lambert-Beer Law. Calibration curves. Application to the quantitative determination of substances in foods.
- **UNIT 4.** Principles of fluorescence spectroscopy.
Fluorescence. Kavanagh law. Quenching. Stern-Volmer equation. Application in foods.
- **UNIT 5.** Principles of atomic spectroscopy.
Absorption atomic spectroscopy. Emission atomic spectroscopy. Application in foods.
- **UNIT 6.** Electrochemical techniques and non-spectroscopic optical techniques.
Physicochemical parameters of interest in foods. Conductimetry. Potentiometry. Refractometry. Polarimetry. Application in foods.
- **UNIT 7.** Calorimetry
Thermochemistry. Calorimeter. Caloric contents in foods.
- **UNIT 8.** Monitoring foods through Instrumental techniques.
Practical cases.

LABORATORY SESSIONS AND SEMINARS

Seminars

- Problems solving.

Laboratory sessions:

- Extraction and identification of food dyes in commercial candies.
- Determination of Brilliant Blue FCF by UV spectroscopy.
- Determination of curcumin by fluorescence spectroscopy.
- Determination of heat of combustion of food samples.

BIBLIOGRAPHY

Basic bibliography:

- Principios de Análisis Instrumental. (5^a Edición) Skoog-Holler-Nieman. Editorial Mc Graw Hill.
- Análisis Instrumental. K.A. Rubinson- J.F. Rubinson. Editorial Prentice Hall.
- Métodos Instrumentales de Análisis. H.H. Willard y col. Grupo Editorial Iberoamérica.

Complementary bibliography:

- Química Física (Vol. 1). M. Díaz Peña, A. Roig Muntaner. Editorial Alhambra.
- Química Física. P. Atkins. (8^a Ed). Editorial Médica Panamericana.
- Química Física. A. Requena. Prentice Hall. Prentice Hall.
- Fisicoquímica: Problemas y Soluciones. L. Lakowitz. Editorial Paraninfo.
- Fisicoquímica. (Vol. 2). Ira N. Levine. 5^a Ed. Editorial Mc. Graw Hill.
- Química Física. J. Morcillo Rubio. 2^a Ed. Publicaciones UNED.

ASSESSMENT. ASSESSMENT CRITERIA, CONTRIBUTION OF THE DIFFERENT ACTIVITIES ON THE FINAL MARK, ETC.)

Two different types of assessments will be considered:

A) Continous assessment. The final mark for those students included in this assessment, will comprises three parts:
1. Written exam about the contents of the subject programme.

It will consists of answering questions (types: tests, applications, theoretical...) (30%) and solving numerical (20%) problems. To pass this exam it will be mandatory to demonstrate a homogeneous knowledge of the subject. The contribution of this part to the final mark will be 60 %

2. To obtain a positive evaluation is necessary to assist to all practice sessions and present a lab-report with the description and resolution of the experiments realized, and to pass the practical exam carried out by a written and/or oral exercise.

Complete practice sessions and pass the exam will be prerequisites for approve the subject. The contribution of practical work to the final mark will be 10%

3. Other activities: oral presentation, lectures attendance, general attitude during the course and participation in class and/or laboratory, will be evaluated and will contribute with 30% to the final mark.

B) One examination. The students who fulfil the requirements specified by the University of Granada and presented in time the corresponding solicitude (two weeks after their registration), shall have the right to make this class of examination. It consists of a just one exam. Exam will consists of answering all questions necessaries (types: tests, applications, theoretical, lab sessions,...) and solving numerical problems. To pass this exam it will be mandatory to demonstrate a homogeneous and unambiguous knowledge of the subject.

FURTHER INFORMATION

- The teaching will be made exclusively in Spanish
- The attendance to practical sessions in laboratory is obligatory.

- The attendance to the lectures is highly recommended.
